Client List

SIT has worked with over 400 companies to date – including many major multi-national corporations. But our client list only includes those who have worked with us more than once – in other words, clients we know for sure were satisfied. And since even *that* group would represent a large number of companies to scroll through, we've given just a sample here, to show you the *range* of clients we work for and the many different fields in which we're working. We're always happy to provide more details about our client list if you contact us.
