

## WHAT IS SIT?

**SIT stands for Systematic Inventive Thinking®**, which is the name of both our company and the method we have developed to help organizations achieve their objectives through innovation.

Most business leaders agree that in order to grow organically, innovation and creative thinking must be encouraged. For this purpose, SIT offers programs that help organizations develop the culture and practices by which innovation thrives. In these programs, we **teach skills** that help you think and act differently in an effective way; work with you to **generate and implement** ideas that are both innovative and practical; and assist in **designing the structures** that will help innovation become consistent, systematic, and reliable.

## WHAT WE DO

The programs are custom designed to suit your organization's needs, goals, and resources, and generally include activities in a variety of areas including:

**Problem-Solving:** Approaching and resolving your most difficult technical/commercial/ organizational problems in new ways

**Strategy:** Looking at company's or team's current marketing, human resources, sales, go-to-market, development pipeline, strategies

**Productivity:** Making your work processes more efficient by applying innovative thinking to boost the results of other methods reducing non-value-add work

**Organisational Innovation:** Building a practice and culture of innovation by creating a comprehensive plan of and supporting it in all aspects of the transformation process.

**NPD:** Developing new products, services, processes, lines, or categories

**Communication:** Creating novel, attractive, and effective ways to communicate internally and externally (customers, suppliers, partners, etc.)

### Additional Services:

**SIT's Online Academy (2017):** Offers introduction to SIT methodology via three courses; 'Innovate with What You Have', 'Process Innovation is in Order', and 'The Innovation Multiplier'.

**SIT4** is the social innovatoin unit of SIT that utilizes SIT resources and provides services to clients at a reduced cost. [1]

**Open-i** offers unique open innovation programs, connecting companies and organisations from around the globe to the Israeli innovation ecosystem.
